NOVEMBER 2022

Introduction

Title

Student Management System

Concept

- Simple project in c to manage student. You can add student, modify theme, delete theme. There is a different option to view all student and view student individually.

Motivation

First and foremost, thanks and praises to the Allah Almighty, for his shower of blessings throughout the research and system to compile the research and system successfully.

We would like to thank the Parents of individuals for supporting and providing financial assistance to compile this research and system successfully.

We want to express our highly gratitude to our Professor who help and guide us to accomplish this research and system.

For our University, we want to express our appreciation for letting us to conduct this research and system for us to successfully compile it.

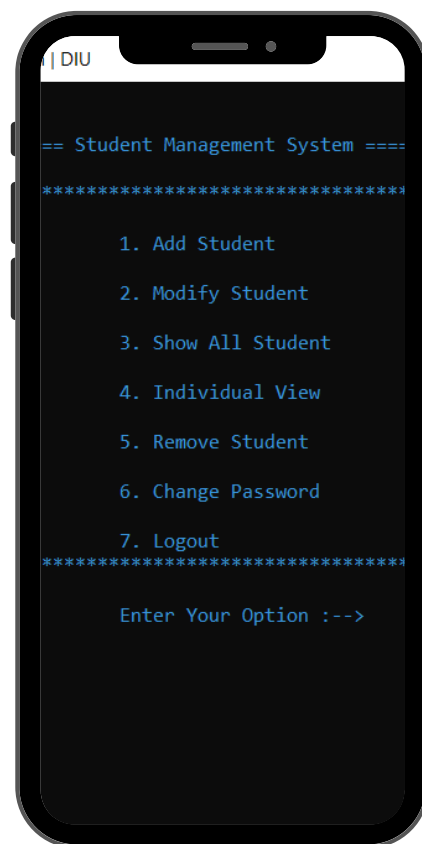

For our Groupmates, thank you for cooperation and providing all the needs to accomplish this research and system.

Features

DIU Student Mngagment System Eight parts

- Login
 - Add Student
 - Modify Student
